IN MEMORY OF GENEVIÈVE RAUGEL

Geneviève Raugel (1951-2019)

On May 10, 2019, Geneviève Raugel passed away in Paris, France. JGM expresses regret about her passing and gives sincere condolences to her family and friends, particularly her husband of nearly 40 years, Gérard Laumon.

Geneviève was born in Strasbourg, France on May 17, 1951. In 1978 she earned her PhD from Université Rennes with a thesis on the numerical resolution of elliptic problems in domains with edges. In that same year, she joined CNRS as a researcher, a position she held until 1994. At that time she was appointed as a research director, 2nd class. At CNRS, she was also a research director, 1st class (2009-2014), and exceptional class (2014-2016). Since 2016, she held an emeritus position at CNRS. She also held visiting professorships at various universities in Canada, Germany, Switzerland, United Kingdom, and United States. She was co-editor-in-chief of the Journal of Dynamics and Differential Equations from 2005-2019 and served on several Editorial Boards, including that of Journal of Geometric Mechanics since 2012.

She was recognized as an international leader in the areas of numerical analysis and bifurcation problems, and, later in her career, in areas of infinite-dimensional dynamics, especially of Navier-Stokes equations in thin domains. Among the honours she received during her career was her selection to give the J. K. Hale memorial

lecture at the 1st International Conference on Dynamics of Differential Equations in Atlanta in 2013.

We at JGM express our appreciation for Geneviève's contributions to mathematics, particularly her service to JGM as a member of the Editorial Board.
